

Report of the Secretary of the EE GA on 28 May 2022 in Konjic.

This will be a very short report as the time span between the two General Assemblies is not a full year.

So, I have taken over the work that Esther has done in an exemplary manner. To her, big thanks for her help and answers to all the questions I asked her during my induction period.

There were not many commitments, as many exhibitions or other meetings were either cancelled due to Covid-19 or had too strict sanitation measures.

Two meetings of the Presidium by video conference were held on 4 and 8 February.

I started the administration of the EE website with the help of Denis Pasque, whom I would like to thank for his patience. Many of you tell me about the difficulties you encounter when logging on to the intranet. Simplification would lead to more registrations.

Thank you in advance for sending documents or reporting errors or omissions.

Only if we get the correct names and addresses of the various responsible persons can the information find the right way to arrive well, and it can then be passed on well.

The EE Members group on Facebook is doing well with over 5,300 members. Information can be passed on very quickly and allows breeders to get in touch with other breeders from so many different countries.

After Poland withdrew from hosting the 30th EE European Show in Kielce, we had the support and understanding of all the members of the Presidium and especially the President Gion Gross.

Many thanks to all of you and especially to my colleagues in the Presidium for their support and help.
